

Build your own solutions with AI.

AI is powerful, yet most SMEs **only scratch the surface**. Teams remain stuck in chat windows, or at best run isolated projects without shared standards, data architecture, or security. Engineering time goes where the revenue is, rightly so, so the tools your own teams need are never built. **With AI coding you no longer have to choose**. The right people are already inside your organisation, and we help them **build their own tools**, because they know exactly what they need.

“Give a man a fish and you feed him for a day. Teach him how to fish and you feed him for a lifetime.”

01 WHAT IT DOES FOR YOUR BUSINESS

Scale without hiring

More volume, hours back, same team.

Quote generation . Document processing . Request triage . Recurring reports . Payment reminders . CRM notes and follow-ups

Replace software

Cheaper, built around your process.

Expense claims . Invoicing and procurement approvals . Financial consolidation . ATS and CV screening . Onboarding and offboarding

Win more deals

Turn traffic into qualified leads.

Prospect self-diagnosis tool . Lead research and enrichment . Personalised outreach . Proposal and SOW drafts . Follow-up sequences

New products

Sell what you could not sell before.

Client-facing AI agents in your product . Self-serve diagnostic tools . New features shipped in weeks . New service lines

02 THE METHOD . ONE START, TWO WAYS TO BUILD

STEP 1 . MAPPING, ALWAYS

We understand your business

2 to 3 weeks, on every engagement.

01 We map the process

Where the time goes, department by department.

02 We shortlist the projects

Scored on payback and effort, so you choose.

03 We set up the environment

Models and coding tools, context files and skills, data access and security. We build your MCP and connect your IT landscape by API.

STEP 2 . YOU CHOOSE HOW IT GETS BUILT

Track A

We train your champions to build

- **We name the champions.** Who inside can carry AI.
- **We train and we coach.** They build, we review.
- **The capability stays in-house.** Training included.

Track B

We build the workflows for you

- **No training, no champion needed.** No bandwidth required.
- **We build it all.** Cross-department work included.
- **Remote or on-site.** Documented and handed over.

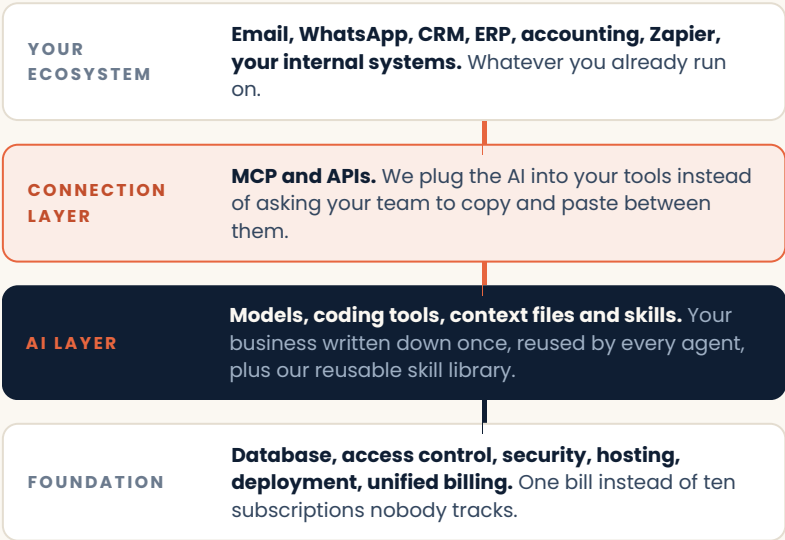

You own what we build.

1 to 3 workflows live and documented, run by your team, with governance. Start on Track B, move to Track A later.

02 THE METHOD, CONTINUED . step 3, what we set up

Not a chatbot. **An AI infrastructure your teams use every day**, built on your tools, your data and your rules.

Reusable agent library

We never rebuild from scratch. Our library makes the build fast, with before and after KPIs.

Always on the latest AI

We track new models and tools, and bring you the best fit rather than the one we know.

03 HOW WE WORK WITH YOU . indicative pricing (SGD), to finalise

	MAPPING processes, projects, people	TRAINING your people, hands-on	WORKFLOWS BUILT 1 to 3, live	HANDOVER docs, governance, you own it
AI Mapping THE STARTING POINT . 2 TO 3 WEEKS \$S\$4,000 to \$S\$6,000 one-off <i>Ranked projects, target architecture, and who inside can build. Yours to keep.</i>	✓			
Training STANDALONE from \$S\$500 / seat <i>Best when your team just needs to go faster, with no project yet.</i>		✓		
Track A . With your champions MONTHLY . TRAINING INCLUDED \$S\$5,450 / month remote \$S\$8,450 / month on-site <i>Best when you want the capability to stay in-house. Includes [X] hours of training per month and up to 3 champions coached.</i>	✓	✓	✓	✓
Track B . We build it for you MONTHLY . REMOTE OR ON-SITE \$S\$4,950 / month remote \$S\$7,950 / month on-site <i>Best when nobody has the bandwidth. No training, no champion required.</i>		—	✓	✓

Typical engagement: Mapping, then 3 months on Track A or B. Month by month, no lock-in.

04 WHO IT IS FOR

SME founders, GMs & COOs

Roughly 10 to 200 staff.

Family businesses

Modernising their operations.

VC & PE-backed companies

Growth targets, tight headcount.

APAC subsidiaries

Leaner local operations.

05 CASE STUDIES

B2B fintech

Business accounts & spend management

CLIENT

CHALLENGE

Slow, manual business onboarding requiring large compliance teams to review documents, causing delays in account activation.

WHAT WE BUILT

An automated n8n AI workflow that handles document analysis, compliance checks and instant self-serve approvals.

RESULT

Manual reviews down to minutes. 20% automatic approval and a 10% reduction in onboarding costs.

Hotel-tech SaaS

Revenue & distribution tools for hotels

CLIENT

CHALLENGE

Website conversion below 1% despite 10,000 monthly visits, failing to turn hotel visitors into qualified sales leads.

WHAT WE BUILT

An interactive self-diagnosis tool letting hotels benchmark pricing, content distribution and online setup against competitors.

RESULT

Tripled the website conversion rate, turning generic traffic into high-intent inbound pitches.

HORECA distribution

Premium tableware & water systems, Singapore

CLIENT

CHALLENGE

Chasing unpaid invoices across multi-outlet hotel and F&B groups ran about two days a week, and every quotation was rebuilt by hand from supplier catalogues.

WHAT WE BUILT

Four workstreams, each owned by an internal champion. The two priority ones: a weekly payment-chasing pass (Xero export, N1 to N5 buckets, drafts per channel, log) and a quotation assistant applying their in-house pricing formula.

RESULT

Chasing pass designed for under an hour instead of two days. Drafts only, and the client now runs both workflows itself.

Data centre infrastructure

Load bank testing for critical power, APAC

STARTING

CHALLENGE

Quoting a data-centre load-bank project meant assembling five pricing blocks from scattered files, then rebuilding a 25-slide proposal by hand.

WHAT WE BUILT

An AI quoting agent co-built on live bids: a dozen input fields, a calibration engine that proposes the configuration, and the priced proposal generated.

RESULT

Faster, more consistent quotes without tying up an expert on routine bids. The expert validates before generation.

Client names shared on request, under NDA.

06 WHO WE ARE

FD

Fabien Deriaux

CO-FOUNDER . PRODUCT, SALES & PRE-SALES

20+ years from engineer to GM and product leadership, across international, multi-industry businesses. Owns the sales and pre-sales side.

[photo to add]

FL

François-Alexandre Léonard

CO-FOUNDER . OPERATIONS & AI ARCHITECTURE

Ex-COO of a digital company (10 years). Owns operations, automation and AI architecture. Built the AI setups behind three of the case studies above.

[photo to add]

Operations on one side, sales and pre-sales on the other. Together, end-to-end expertise on the functions your business actually runs on.
